Height: 12 inches

Spread: 6 feet

Spacing: 24 inches

Sunlight:

Hardiness Zone: (annual)

Description:

A disease resistant, high yielding and vigorous variety; produces long and slender dark green cucumbers with small white spines; crisp and bitter free, perfect for slicing, snacking and salads; small seed cavities and thin skin, no peeling needed

Edible Qualities

Tasty Green Cucumber is an annual vegetable plant that is typically grown for its edible qualities. It produces dark green long cucumbers (which are technically 'berries') with white spines and light green flesh which can be harvested at any point. The cucumbers have a sweet taste and a crisp texture.

The cucumbers are most often used in the following ways:

- Fresh Eating
- Eating When Cooked/Prepared
- Pickling

Planting & Growing

Tasty Green Cucumber will grow to be about 12 inches tall at maturity, with a spread of 6 feet. When planted in rows, individual plants should be spaced approximately 24 inches apart. This vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant is typically grown in a designated vegetable garden. It should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is quite intolerant of urban pollution, therefore inner city or urban streetside plantings are best avoided. This is a selected variety of a species not originally from North America.; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Tasty Green Cucumber is a good choice for the vegetable garden, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing the canvas against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
